Method Overriding

JAVA: Method Overriding in Java

- **Method Overriding** : If child class has the same method as declared in the parent class, it is known as **method overriding in Java**.
- Method overriding is used to provide the specific implementation of a method which is already provided by its superclass.
- Method Overriding is also called **RunTime Polymorphism**.
- **Rules of Method Overriding?**
 - The method must have the same name as in the parent class.
 - The method must have the same parameter as in the parent class.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style, with the exclamation mark being the final stroke. The background is a plain, light-colored surface.
