

JAVA

String in Java

JAVA: String in Java

- **String** : String is a sequence of characters. But in Java, string is an object that represents a sequence of characters.
- String is a Class in Java.
- Create String Object:
 - By String Literal
 - By new Keyword
- Example to Create the String

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style. The background is plain white.
