

JAVA

String Methods Part-IV

JAVA: String Class Methods

- **String substring()** : method returns a part of the string.
- **String toCharArray()** : method converts this string into character array.
- **String toLowerCase()** : method returns the string in lowercase letter.
- **String toUpperCase()** : method returns the string in uppercase letter.
- **String trim()** : method eliminates leading and trailing spaces.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style, with the exclamation mark being the final stroke. The background is a plain, light-colored surface.
