*Method Overloading*

## *JAVA: Method Overloading in Java*

---

- **Method Overloading** : If a class has multiple methods having same name but different in parameters, it is known as **Method Overloading**.
- Method overloading increases the readability of the program.
- **How to Achieve Method Overloading?**
- By changing number of arguments.
- By changing the data type.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, completing the cursive phrase 'Thank you!' on a white background. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker's tip is just finishing the exclamation mark. The cursive script is fluid and elegant.
